About a year ago four Swiss brothers **smashed it** with a couple of EP's featuring heavyweights Sizzla, Cutty Ranks and underground legends Oddatee and Sensational. **BBC1's** host **Mary Anne** (we're missing you!) Hobbs took notice and dropped the debut on her show - positioning **Talen** amidst the **cream of the Bass scene**. Instead of basking in the limelight and peacefully riding out the wave, the duo holed up in the studio for another year to create an even thicker package - **Comic Book** is the end result! The **EP** features the **vocal talent** of **Lady Saw, Turbulence** and **Ward 21**. Remix duty is handled by the **Bass mafia** international: **Stereotyp, Kalbata, Robot Koch, Reverse Engineering, Son Of Kick, Filewile, I-Wolf** and **King Aron**.

The package covers the chew-your-bass-cabinets-off type of **Future Dancehall**, explores detail filled Post Step and of course touches on some sounds that are just impossible to categorize!

The vinyl includes all 3 Talen originals and remixes by **Robot Koch, Son Of Kick** and **Kalbata**. The rest of the package is available only as download (included with Vinyl 12")
